

Revenue teams are burning hours on stale provider data. Product teams are building care navigation on directories that are wrong before they go live.

It all works better when the data is accurate.

Candor Health's AI-native platform is the provider data intelligence layer behind go-to-market precision and care navigation accuracy.

Powered by purpose-built data agents, Candor Health processes 120,000+ sources and 4B+ claims monthly, turning fragmented inputs into continuous intelligence revenue and product teams can act on.

Find. Track. Reach. Navigate.

From provider lists to care navigation on one verified data foundation.

Why digital health teams choose Candor Health

- ✓ **70+ Filter Fields and 4.5M+ Daily Signals**
Find the right providers and know where they move before your CRM does.
- ✓ **Automated Payer Plan Matching**
Resolve messy plan names and surface verified in-network providers by region and condition.
- ✓ **Care Navigation Intelligence and Referral Intelligence**
Connect patients to the right provider and reduce failed referrals with verified, real-time data.

Built for revenue and product teams

Sales & Business Development

Build precise provider lists by specialty, procedure, insurance, and affiliation in minutes, not days.

Revenue Operations

CRM enrichment that stays current, with movement signals that trigger updates before outdated data drives outreach.

Growth & Marketing

Segment by clinical specificity, conditions treated, procedures performed, top 1% rankings by volume, not just specialty codes.

Product Teams

Power care navigation, referrals, and payer-plan matching with the verified provider data trusted by leading health plans.

THE PROOF IS IN THE DATA
