Candor Health | IDN Intelligence

Provider data you can trust

Provider organizations are complex. See everything connected to a health system or provider group.

Stay in sync as it changes.

Facilities, locations and affiliations are hard to untangle, and they keep changing. IDN Intelligence maps every parent organization and group TIN to its facilities and the physicians who work there. It tracks acquisitions, closures and relocations, so contracts and rosters stay current and members can find care their plan covers.

One clear view of each health system

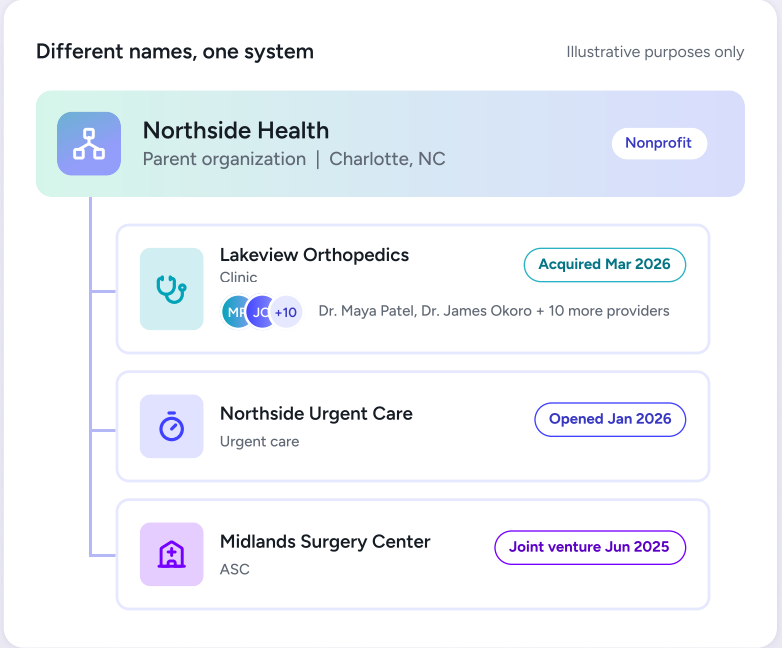

Every Facility
Hospitals, ASCs, urgent care, imaging, labs, and group practices together, not spread across separate tools.

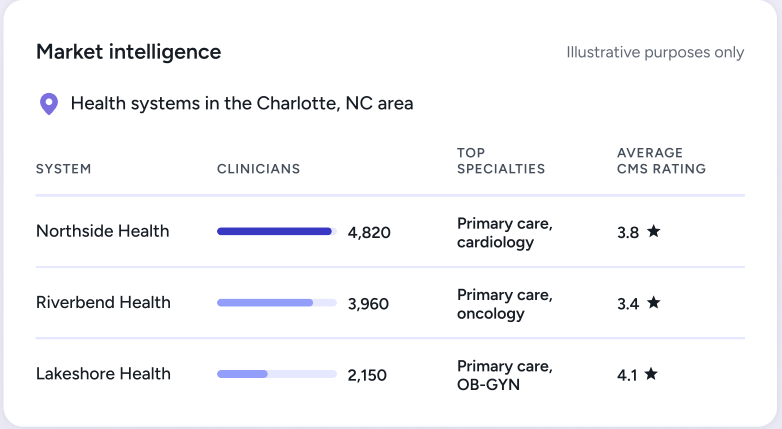

Every Provider
The clinicians connected to the system, by specialty.

Every Change
Every acquisition, divestiture, and closure, with what changed and when.

BUILT ON PHYSICIAN 360 AND FACILITY 360

health systems and provider groups	Physician 360 profiles linked	acquisitions, divestitures and mergers captured

Care Navigation

- **Find lower-cost care.** Identify independent labs, imaging centers, and urgent care.
- **Support member preferences.** Guide members to systems and specialty centers they trust.
- **Keep care connected.** Help members stay within one system for coordinated care.

Network Management

- **Negotiate with confidence.** Know what's connected to each system and when acquisitions affect contracts.
- **Close network gaps.** Identify systems that address multiple adequacy needs.
- **Market share.** Compare systems in a market by share of facilities, beds and providers, and the procedures they perform most.

Data Operations

- **Find missing providers.** Compare rosters with system footprints to uncover network gaps.
- **Connect TINs and NPIs.** Link billing entities and acquired brands to their parent system.
- **See every clinician.** View providers across a health system by specialty.
