

Provider data powers critical workflows across every part of healthcare. It's also the hardest layer to keep accurate and current.

That's what Candor Health solves.

Candor Health built a living, breathing provider data set, powered by purpose-built provider data agents that scan across 120,000+ sources and 4 billion claims monthly. Reliable, actionable, and built for every workflow that depends on knowing who providers are, where they practice, and what they do.

Ingest. Score. Validate. Refresh.

The infrastructure behind accurate provider data.

How Candor Health Works:

- 
Ingest
120k+ sources into a single system of truth
- 
Score
AI/ML confidence scoring across 70+ fields
- 
Validate
AI plus real-world human verification
- 
Refresh
95%+ of sources monthly, republished daily

Built for the healthcare data ecosystem

Health Plans

Know exactly what's in your directory. Get a prioritized action plan to fix it. Use the Accuracy Scorecard to track improvement and defend compliance.

Health Systems

AI-powered find-a-doctor. Referral visibility. Acquisition and recruitment intelligence backed by facility ownership data.

Digital Health

Clean provider lists and real-time movement signals for revenue teams. Automated payer plan matching and care navigation intelligence for product teams.

The proof is in the data

Why healthcare organizations choose Candor Health:

One data foundation, every use case.

The same verified, daily-refreshed provider data set powers directory accuracy, care navigation, network building, and provider prospecting. No separate vendors per workflow.

Delivery your way.

UI, API, MCP, S3, or sFTP. Standard identifiers (NPI, CCN, TIN) out of the box. Connects to your existing systems without a rip-and-replace.

Built for compliance.

Meet REAL Health Act, No Surprises Act, NCQA directory requirements with data that's continuously verified, not attested once a quarter.

The infrastructure behind provider data you can trust.
